AMENDMENT UNDER 37 C.F.R. 1.111

In reply to the Office Action mailed September 13, 2002, please amend the above-identified application as follows:

IN THE CLAIMS:

Please replace claims 16 and 20 as follows:

C¹
16. (Amended) A disk refiner comprising a switched reluctance motor comprising a stator and a rotor rotatably disposed along a longitudinal axis within said stator, said rotor carrying a refiner plate, a second refiner plate positioned along said longitudinal axis and adjacent said first refiner plate, and magnetic bearings operatively associated with said stator and rotor for supporting said rotor, the disk refiner further comprising an end plate adjacent said stator and rotor and having said second refiner plate mounted thereon, and linear movement actuator means for selectively moving said second refiner plate along said longitudinal axis toward and away from said first refiner plate.

C²
20. (Amended) A disk refiner comprising a switched reluctance motor comprising a stator and a rotor rotatably disposed along a longitudinal axis within said stator, said rotor having a first end carrying a first refiner plate and a second end carrying a second refiner plate, a first end plate spaced axially from said first refiner plate and a second end plate spaced axially from said second refiner plate with said first and second end plates and said stator defining an enclosed housing, a third refiner plate mounted on said first end plate and axially spaced from said first refiner plate, a fourth refiner plate mounted on said second end plate and axially spaced from said second refiner plate, and magnetic bearings operatively associated with said stator and rotor
